

ELMS for Office 365

Compare our fully-managed solution

Kivuto's automated solution simplifies the management and delivery of Office 365 ProPlus benefits. With the fully-managed solution, the work processes associated with user management, license distribution and ongoing program management are entirely automated. ELMS automatically authenticates, creates and provisions users in either new or existing Office 365 tenants.

Take a look at how this solution stacks up against the rest.

On-demand reporting and tracking			●

*For auto license only scenarios

**Kivuto's ELMS platform supports Shibboleth authentication by verifying a user within the ELMS platform at the web store level. Once the user orders the software, a username and password is created on behalf of that user within the Office 365 environment. Important note: Shibboleth without the Kivuto ELMS platform is not supported directly by the Office 365 environment.

How ELMS simplifies for you

Set Up

Easy set up

We'll deploy a webstore & begin managing your O365 tenant in as few as 2 business days

Branded to your School

Your ELMS webstore is branded to your school, providing a unique experience for your users

One-stop shop for all software agreements'

Manage and distribute any other software with ELMS including Microsoft Home Use Program & Work at Home, Microsoft DreamSpark, Adobe ETLA, VMware Academic Program & many more

Self-Service

With an ELMS webstore, your users can access their products at any time without any intervention from you

User Management

Federated ID / Shibboleth Integration

ELMS supports real-time user authentication from many different Federated Identity Systems (InCommon, UK Access Federation, Canadian Access Federation, etc.)

Kivuto's ELMS platform supports Shibboleth authentication by verifying a user within the ELMS platform at the web store level. Once the user orders the software, a username and password is created on behalf of that user within the Office 365 environment. Important note - Shibboleth without the Kivuto ELMS platform is not supported directly by the Office 365 environment.

LDAP ID Integration

ELMS can easily integrate into your organization's LDAP for real-time user authentication

MS Active Directory Integration

In real-time, ELMS supports user authentication through simple integration with your organization's Microsoft AD

Email domain verification

Verify your users against one or more allowed email domains

Manual user import verification

Easily add or remove users through imports without needing to write custom Powershell scripts

Multiple domain support in single tenant

If you use sub-domains or have multiple domains for your users, keep them all in a single tenant

Automatic provisioning of licenses

Users are automatically provisioned for the correct license/SKU within the tenant. No need to write custom Powershell scripts

License renewal management

After a defined time period, users are automatically disabled when they are no longer eligible. All of this is completed via ELMS and does not require any custom work from you

Multiple Office 365 SKUs available

Enable users to be provisioned for other Office 365 products and services, like A2 or A3 in a single experience

Hands-off management

Kivuto takes care of everything; removing the administrative burden on you and your team

Full admin and end user support

Receive resources and full account management support whenever and wherever you need it

Kivuto's multilingual Customer Care agents - available by toll-free phone and email - provide end user support so you don't have to

On-demand reporting and tracking

Get access to a full suite of user & order reports; all of which are available on-demand

What is ELMS?

Our *Electronic License Management System* (ELMS) provides verification, account management, e-commerce, secure distribution, reporting and more in a cloud-based environment engineered for advanced digital distribution and management applications. With ELMS, you receive a school-branded webstore where your community can easily and effortlessly access the software titles they need without any ongoing administration duties required by you.
